## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

## REGION III

841 Chestnut Building  
Philadelphia, Pennsylvania 19107

**SUBJECT:** Removal action Work Plans for the  
Hunterstown Road Site; Westinghouse PRP

DATE: JUL 22 1987

**FROM:** Bill Steuteville, Environmental Scientist  
CERCLA Removal Enforcement Section

**TO:** David Crownover, Project Officer  
PADER Bureau of Solid Waste Management

Enclosed please find three (3) Work Plans (WP) developed by Westinghouse Electric Company for Removal actions at the Hunterstown site. These actions will be undertaken as amendments to the current Removal Consent Agreement and Order between EPA and Westinghouse for the Hunterstown site.

The WPs pertain to further actions necessary at the site in the following three areas:

1. Stabilization of the asbestos disposal area;
2. Stabilization of the channel of the East Branch of Rock Creek; and
3. Removal assessment of the two (2) suspected drum burial sites.

Westinghouse is prepared to begin these actions immediately, pending EPA approval of the WPs. EPA wants these actions to begin as soon as possible. I am prepared to approve these plans with a few minor changes. However, I will delay for a few days for you to look at the WPs. I realize that this is short notice, but I just received the WPs this week myself. Please call me at (215) 597-6678 immediately, if you have any comments or concerns. I will forward to you a copy of my review of these plans.
